Transforming lives in Dubai one home at a time

Welcome to Town Square, Dubai brought to you by Nshama.

Born in Dubai, and relatively new on the scene, Nshama is developing one of the UAE's most sizeable residential projects at price-points that people can afford.

Aimed at mid-income residents looking to own their own home, Town Square, Dubai has risen to the challenge when it comes to combining quality homes with community amenities that can be enjoyed by all the family.

Town Square, Dubai is a vibrant community with abundant amenities for healthy living, all within a short commute to the best that Dubai has to offer.

Soon to become home to 85,000 people in the form of townhouses and apartments, 4,947 homes are currently underway and AED 3.0 billion of awarded contracts have already been mobilised.

In December 2017, the first 2,000 homes will be handed over, only a few months after the first homes were sold.

"All our projects are similarly planned to meet the growing middle-income demand for end-user homes, led by our vision to bring a new lifestyle choice to Dubai that transforms the lives of people."

FRED DURIE
CEO-NSHAMA

A Destination Community

Town Square Dubai 'Best International Site Plan'

Town Square, Dubai is anchored by a central square, the size of 16 football fields, as well as a new Vida Town Square, Dubai hotel and Reel Cinemas complex. Residents will have access to over 2.5 million sq.ft of retail with over 600 shops, food and beverage outlets.

The project is conveniently located in New Dubai near Al Barsha and in close proximity to Arabian Ranches Golf Course, Dubai Polo & Equestrian Club and Al Maktoum International Airport, near the World Expo 2020 site.

The Town Square, Dubai master plan is the first of its kind. The smartly designed, stylish, green neighbourhood caught the attention of voters and judges and won the prestigious Gold Nuggets 2016 Award for 'Best International Site Plan.'

The international jury members were highly impressed with the outdoor articulation and scale of the 750-acre project located in New Dubai, near Al Barsha.

Fred Durie, Chief Executive Officer of Nshama, said: "Securing the Gold Nugget 2016, as we prepare to mark the first hand-over of homes next year, highlights our innovative approach to site utilisation to create a trendy neighborhood. This adds to the 'live at your price' value proposition of the Town Square

homes. Our goal is to offer a diverse choices of lifestyle amenities and leisure attractions in close proximity for our residents, and create added value for their investment in Dubai's most sought-after affordable community."

Don Ruthroff of Dahlin Group Architecture Planning in Pleasanton, CA, expressed that the competition in 2016 was exceptionally diverse, with winners coming from throughout the US and international destinations. He added, "Creative ideas in design

do not know boundaries. We found the variety and level of excellence to be particularly heartening this year."

The utilization of Town Square Dubai, takes into account the provision of day-care facilities, playgrounds for all ages, adventure zones, splash parks, along with modern medical facilities. The health facilities did not undergo an oversight and are equipped with modern medical facilities, athletic spa, top of the class fitness centers, interactive water features and skate parks.

Light Bulb Terrarium

Gather your family this weekend and create something for your home. Make the best out of everything available in your garage to decorate your new home at Town Square Dubai. Learn how to make a terrarium out of a lightbulb using materials that you might already have. You will need: Pliers, Bolt, Sticky feet, Funnel, Rocks, Sand, Skewer, Scissors, Plant and a Lightbulb!

1

Remove the electrical contact and the fuse and filament from the lightbulb. Use pliers to take off the electrical parts from the lightbulb. Use a bolt to clear out the bottom part of the bulb.

2

Stick on some self-adhesive rubber "feet" to the bottom of the lightbulb. With these, the bulb will be able to stand on its own.

3

Use the funnel to pour the small rocks into the lightbulb, then follow with the sand. Once these are in, insert the plant clippings.

4

Adjust the placement of everything inside the lightbulb using the skewer. To water your plant, you can use an eyedropper, or just drip some water in from the faucet. Water the plant whenever it looks drier than usual.
